

The electromagnetic door holder supports fire control system, fire control modules. It is widely used in all kinds of fire proof doors, anti smoke doors and auto-doors.

Features :

1. Working mode: Fail safe, power off to unlock,
2. Floor and wall mount,
3. Automatically close the smoke proof door when fire happens,
4. Manual door release button, safe,
5. Anti-residual magnetism design,
6. MOV provides reverse current protection,
7. Low power consumption, environmental protection.

Specifications :

Working voltage	12±10%
Working current	60mA
Holding force	60kg/130lbs

Installation :
