

Turnstile with Barcode Scanner

Turnstile with Barcode Scanner

Description

The barcode scanner system is one optional function for all the turnstiles. When we add this function to the turnstile, it includes barcode scanner, converter, control panel and power supply.

Make a credential with numeric 1D or 2D barcode. The credential can be paper/PVC card with printed barcode or a digital picture in mobile phone.

The privilege of different credential will be set in the access control system. The number of the credential will be distributed into different control panel according to the access level. And you can set the valid date of the credential in order to have a more secure system.

When the user takes the credential to the turnstile, scan the barcode on the reader. The number of the barcode will be processed by access control panel, the access control panel will trigger the turnstile to open if it is a valid credential.

Application

- Visitor management in office building
- Ticket system for stadium or concert
- Member management for club or gym

Features

- Integrated barcode system and turnstile
- Cost effective credential
- Easy to integrate with mobile phone APP
- Elegant design
